

SQRL SQUIRRELS AWAY HOLLOW CORES AND SCARIFIED TURF MATERIAL

This robust, walk-behind machine makes light work of clean-up operations on greens, tees and other fine turf areas. Hollow cores, scarified material and similar surface debris are easy pickings for the SQRL – both in the wet and the dry.

- Self-propelled, walk-behind specialist turf debris collector with high-dump hopper.
- Very versatile and highly productive – one machine is able to collect both hollow cores and scarified material plus other light, loose surface debris.
- Fully-floating 600mm collection head follows turf contours closely for successful one pass clean-up operations. Can also be used on composite surfaces.
- Low weight and wide tyres enable operations to continue in all conditions without compacting or marking turf.
- Material is gathered cleanly across the full head width – no brushing, blowing or windrowing required.
- Extremely compact – just 940mm wide.

SQRL Pedestrian Greens Sweeper

Lightweight, manoeuvrable and very effective, the SQRL has a high-dump (1.2m above ground) hopper enabling collected material to be emptied quickly and cleanly into trailers and specialist turf work vehicles. Designed and built in Britain, the SQRL will save you hours of time and labour, cutting costs and boosting productivity.

Ask us for a demonstration today and get a SQRL working for you tomorrow.

Product Specification

Sweeping Width	60cm (24").
Design	Self propelled, walk behind debris collector with excellent maneuverability without scuffing on delicate Greens.
Power	Honda GXV390 13 HP (net HP) (9.6kW) at 3600rpm. Air cooled 4 stroke.
Traction Drive	Belt driven transaxle. Infinitely variable speed between 0-7 KPH.
Debris Hopper Capacity	0.35 cubic metres. Hopper contents are visible through Perspex window from operator position.
Debris Hopper Dump	High-lift dump 1.2m (4'0"); hydraulic operation
Sweep Head Engage	Manually operated lever.
Sweeping Head	60cm (2') wide; belt-driven high speed brush; adjustable sweeping height and aggression level; follows terrain with float position on full width rear roller; Lifted hydraulically.
Tyres	Rear: 12 x 6 / Front: 18 x 9.50-8 both with optional turf treads – multi-rib or smooth.
Dimensions	Length: 2.4m (7'10"); Width: 0.94m (3'2"); Height: 1.1m (3'8").
Weight	Net: 390Kg (858lbs) Gross: 590Kg (1,298lbs).
Brakes	Cable operated parking / emergency brake .
Electrical	12-volt.
Frame	Heavy square structural tubing; electrically welded.
Speed	Infinitely variable; forward 0-7 Kph (4.5 mph); reverse 0-3.5 Kph (2.0mph).
Fluid Capacities	Petrol (Gasoline) unleaded: 6.5 Litres (1.4gallons) Hydraulic fluid: 10 Litres (2.2 gallons).
