

Viba-Timer

Vibration-activated digital hour meter

Turfmech's Viba-Timer is suitable for fitting to any machine that has no in-built means of recording operating hours. Typical applications include trailed and mounted mowers, top dressers, aerators, scarifiers, debris blowers and collectors, cultivations equipment, sprayers, fertiliser spreaders and many other horticultural and agricultural machines.

- Requires no wiring or external power source
- Uses highly-sensitive vibration activation
- Read-out shows hours and tenths of an hour
- Clear and proven "always on" LCD display
- Internal battery gives up to 8 years operating life
- Accuracy guaranteed to + or - 0.01%
- Available now to OEM's, machinery dealers and end users at a very economical price

Viba-Timer

Vibration-activated digital hour meter

The new Viba-Timer from Turfmech is a vibration-activated digital hour meter suitable for fitting to any machine with no in-built means of accurately recording working hours.

By displaying the actual working hours of the machine to which it is fitted, Viba-Timer enables regular servicing and maintenance schedules to be carried out in line with the manufacturer's recommendations, ensuring that the machine continues to perform at peak performance and optimum safety, while also fulfilling warranty requirements.

Viba-Timer is ideal also as a factory- or dealer-fitted addition to any machine that has never previously had a regular servicing schedule laid down. By accurately recording and displaying actual working hours, Viba-Timer allows manufacturers, distributors, dealers, plant managers and others to plan and programme a machine's future servicing programme based on fact rather than guesswork.

Easily and quickly fitted to any new or existing machine, the Viba-Timer is available now from Turfmech Machinery at a retail price of £110 + VAT.

For trade enquiries or to order your Viba-Timer, please contact Turfmech Machinery at the address shown below.
